All Attendees: All attendees will receive a CEU certificate for the appropriate number of hours they have completed.

The SCERTS® Model is... “where autism intervention should be.”

PsychCritiques
American Psychological Association

For EI staff, educators, SLPs, OTs, psychologists, social workers, paras, parents and others supporting the development of preschool and school-age children and their families.

The SCERTS® Model is being adopted by public and private agencies in New Zealand, England, Australia, Canada, and throughout the US!

Experts in ASD comment on the SCERTS® Model:
“The SCERTS® Model marks a critical turning point in the education of children with ASD”
 — Carol Gray, Director, The Gray Center for Social Learning and Understanding, Author and Developer of Social Stories
“The SCERTS® Model (is) the most comprehensive, well researched approach for people on the autism spectrum that I have ever seen.”
 — Stephen Shore, Executive Director, Autism Spectrum Disorder, Author, *Beyond the Wall: Personal Experiences with Autism*
Eminently practical, realistic and comprehensive... We need to make (the SCERTS® Model) an integral part of the training of professionals and caregivers.”
 — Ami Klin, Ph.D., Harris Associate Professor of Child Psychology and Psychiatry, Yale University Child Study Center, Editor of the *Handbook of Autism and PDD*
“An integrative, holistic approach for supporting children with ASD and their families.”
 — Pat Miranda, Professor, Department of Educational Psychology and Special Education, University of British Columbia, Author of *Augmentive and Alternative Communication*

Barry Prizant, Ph.D., CCC-SLP has more than 30 years experience as a clinical scholar, researcher and consultant to young children with social communication disabilities including autism spectrum disorders (ASD) and their families. He is the Director of Childhood Communication Services, a private practice, an Adjunct Professor in the Center for the Study of Human Development, Brown University, and a Fellow of the American Speech-Language-Hearing Association. He consults for numerous school districts and families. Barry has published more than 90 peer-reviewed articles and chapters, consults to five professional journals on communication disabilities in children, and is the co-editor of *Autism Spectrum Disorders: A Developmental Transactional Perspective* (with Dr. Amy Wetherby).

Amy Laurent, Ed.M., OTR/L is a pediatric occupational therapist who holds a Master's in Special Education. Currently in private practice, she is a New England affiliate of Communication Crossroads and of Childhood Communication Services and is an adjunct faculty member at the University of Rhode Island. Amy specializes in the education of children with ASD and related developmental disabilities. Her publications have focused on emotional regulation in children and adolescence with ASD and their impact on later social competence. She frequently lectures throughout the U.S. on topics related to the therapeutic and educational intervention for children with ASD.

INTRODUCTORY & ADVANCED TRAINING

Register for 1-Day Introductory, 2-Day Advanced or all three days.

Learn how the SCERTS® Model enhances practice for school teams.

How You Will Benefit from attending the SCERTS® Introductory & Advanced Seminars

New to the SCERTS® Model?

- Learn about this exciting new team-based multidisciplinary approach for supporting children with ASD and their families across school, home and community settings. SCERTS® focuses on addressing the core challenges of ASD – Social Communication, Emotional Regulation through the implementation of Transactional Support

Familiar with the SCERTS® Model?

- Receive advanced training on the innovative 10-Step SCERTS® Assessment Process (SAP)
- Learn to develop an individualized SCERTS® Model Program with identification of goals and strategies for children at the

following developmental stages: Social Partner, Language Partner, Conversational Partner

- Learn about specific strategies for supporting parents and developing a support system among professionals

For All:

- Meet Barry and Amy, and have opportunities to share creative ideas and discuss approaches to implement the SCERTS® Model in your school, agency or practice
- Become part of a network of professionals and parents from the U.S. and other countries who are using the SCERTS® Model to guide programming for children with ASD and their families

A Framework and Guide

The SCERTS® Model:

The SCERTS® Model is a new, innovative approach that offers a framework of specific goals and procedures for assessment and educational programming. The SC, ER and TS domains of the Model directly address the core challenges faced by children with ASD.

Social Communication focuses on building a child's functional spontaneous communication, emotional expression, and social relationships that allow a child to be a competent and confident communicator across many social settings and social partners.

Emotional Regulation focuses on helping a child to be most available for learning and interacting, and for preventing problem behaviors that interfere with learning and the development of relationships.

Transactional Support ensures that the proper supports are in place to best support a child and his or her family, including peer relationships in inclusive settings.

The SCERTS® Model respects and recognizes individual differences across a range of ages and developmental abilities based on understanding a child's strengths and needs. It is applicable for children from early stages of communication through conversational abilities, from early intervention through the elementary school years and beyond.

The SCERTS® Model is not exclusive of other approaches: It is flexible enough to incorporate practices from approaches and teaching strategies that have been proven effective with children with ASD. It is comprehensive and integrated, representing a new generation of educational approaches and evidence-based practice.

The SCERTS® Model is a team model. It's designed to encourage professionals from different disciplines to collaborate with families. Families are included as partners in assessment and education efforts that cut across school, home and community settings.

Progress is measured in everyday functional activities with a variety of partners, recognizing the absolute necessity for supporting communication and socioemotional development in everyday activities and routines.

The SCERTS® Model incorporates educational strategies derived from empirical research and sound clinical/educational practice. The collaborators (Barry Prizant, Amy Wetherby, Emily Rubin and Amy Laurent) draw from almost 100 years of collective experience and training in a variety of treatment models for children with ASD, and have published over 130 articles and chapters, as well as books and assessment instruments.

Three-Day Seminar

DAY 1: Introductory Seminar

- Core values and developmental foundation for The SCERTS® Model. SC, ER & TS domains
- How the SCERTS® Model reflects characteristics of quality educational programs and recommended practices.
- Brief overview of the SCERTS® Assessment Process
- SCERTS® Educational Practice Principals
- Enhancing abilities for children at three developmental stages of communication. Goals and strategies for: *Social Communication, Emotional Regulation, and Transactional Support.*

DAYS 2 & 3: Advanced Implementation Seminar

- Training in the 10-Step SCERTS® Assessment Process & Curriculum. A child and family centered observational assessment process that provides quantifiable measures of progress and data-based decision-making. Case presentations of children at a variety of levels.
- SCERTS® in action: Making SCERTS® work in school, home and community settings. Practical implementation strategies for coordinating goals and objectives for children at three developmental levels – Social Partner, Language Partner, Conversational Partner. Strategies to link child and partner goals.
- Approaches to enhance support to families and support among professionals.
